

# DEVELOPER SPEC & BRAND KIT

Peak Studios CO — Inbound Sales System

Landing Page · Booking System · CRM · Google Calendar Integration

Prepared for Developer Handoff | Victoria & Vancouver, BC

## OVERVIEW

This document covers everything needed to build the full inbound sales system for Peak Studios CO's Legacy Video service. The system is designed to convert cold Meta ad traffic into booked discovery calls, which are then closed manually by the owner via a Wave payment link.

**Payment Processor:** Wave — owner sends payment link manually after discovery call

**Booking Calendar:** Google Calendar API — peaklegacyvideos@gmail.com

**Ad Platform:** Meta (Facebook / Instagram)

**Availability:** Monday to Friday, 9:00am – 5:00pm Pacific Time

**Call Length:** 30-minute discovery call slots

## SECTION 1 — BRAND KIT

### Primary Colour Palette

| Mystic Forest | #233415 | Primary background, headers, dominant UI |
|---------------|---------|------------------------------------------|
| Golden Hour   | #CEA64A | CTAs, highlights, accent elements        |

### Secondary Colour Palette

| Moss Green   | #93A888 | Subtle backgrounds, dividers        |
|--------------|---------|-------------------------------------|
| Earthy Blush | #D8A48F | Warm accents, emotional sections    |
| Tofino Blue  | #597B7E | Supporting text, secondary elements |
| Pale Sky     | #C7D8E4 | Light backgrounds, form areas       |

## Typography

| Titles / H1 / H2 | Alata | Sans-serif, sleek, contemporary. Google Fonts. |
|------------------|-------|------------------------------------------------|
| Subtitles / Body | Cardo | Classic serif. Google Fonts.                   |

- Title (H1): 3x body size — Alata bold
- Subtitle (H2/H3): 2x body size — Cardo
- Body text: 16-18px — Cardo regular
- Google Fonts — Alata: [fonts.google.com/specimen/Alata](https://fonts.google.com/specimen/Alata)
- Google Fonts — Cardo: [fonts.google.com/specimen/Cardo](https://fonts.google.com/specimen/Cardo)

## Logo Usage

- Primary logo: use whenever possible (full lockup)
- Secondary logo: use when space is constrained
- Tertiary logo: use for favicon, app icon, watermarks
- Whitespace rule: maintain 0.5x icon height as clear space on all sides
- On dark backgrounds (Mystic Forest): use light/gold version
- On light backgrounds: use dark version

---

## SECTION 2 — LANDING PAGE SPEC

---

### Purpose

Single-page, conversion-optimised landing page. All Meta ad traffic lands here. The sole goal is to get the visitor to click one of two CTAs: "Reserve Your Time Today" or "Have questions? We'd love to chat." There is no navigation menu. No links away from the page. Every element moves the visitor toward one of those two actions.

### Page Structure (in order)

#### 1. Hero Section

Full-width Mystic Forest background. Logo top left. Large H1 in Alata. Subheadline in Cardo. Single Golden Hour CTA button: "Reserve Your Time Today". Supporting line below CTA.

#### 2. Emotional Hook

Light background (Pale Sky or white). H2 headline + body copy. No CTA — builds desire only.

#### 3. How It Works

Dark or mid-tone background. 5-step visual flow with icons or numbered steps.

#### 4. Packages

Two-column card layout. THE LEGACY (\$2,500) and THE HEIRLOOM (\$3,500 — flagged Most Popular). Each card has its own CTA linking to the booking flow.

#### 5. Trust / Reassurance

Light background. Short headline + body. CTA: "Get in Touch".

#### 6. About Peak Studios CO

Dark background (Mystic Forest). Headline + body copy. No CTA — credibility section.

#### 7. Footer CTA

Full-width dark section. Large headline. Subheadline. Primary CTA: "Reserve Your Time Today". Secondary link: "Have questions? We'd love to chat."

### Technical Requirements

- Mobile-first — majority of Meta ad traffic is mobile
- Fast load time — target under 3 seconds on mobile. Compress all images.
- No external navigation — no header nav links, no footer links to other pages
- Meta Pixel — install on page. Fire "Lead" event when booking is confirmed.
- SSL — must be HTTPS
- Thank you state — show confirmation after booking so Meta Pixel fires conversion event
- Booking flow triggered when either CTA is clicked (see Section 3)

---

## SECTION 3 — BOOKING SYSTEM SPEC

---

### Booking Flow — Step by Step

#### Step 1 — Short Lead Form

Collect the following fields before showing the calendar:

- First Name (required)
- Last Name (required)
- Email Address (required)
- Phone Number (optional)
- Which package are you interested in? (dropdown: The Legacy \$2,500 / The Heirloom \$3,500 / Not sure yet)
- Anything you'd like us to know before the call? (optional text field)

#### Step 2 — Calendar Slot Picker

- Show available time slots: Monday to Friday, 9:00am – 5:00pm Pacific Time
- 30-minute slots
- Available slots pulled live from Google Calendar (see Google Calendar Integration below)
- Any blocked time in Google Calendar is automatically unavailable
- Display timezone clearly (Pacific Time / PT)

#### Step 3 — Confirmation

- Show confirmation screen with date and time
- Send confirmation email to lead
- Send notification email to peaklegacyvideos@gmail.com
- Create Google Calendar event automatically with lead details
- Trigger Meta Pixel "Lead" conversion event
- Add lead to CRM and start email sequence (if applicable)

### Google Calendar Integration

#### Account:

peaklegacyvideos@gmail.com

The booking system connects to Google Calendar via the Google Calendar API. When a visitor books, the system automatically creates an event in the Peak Studios CO Google Calendar. Available slots are calculated by checking the calendar for existing events — when the owner blocks time or adds any event, those slots disappear from the booking picker automatically.

#### API Setup (owner to provide):

- Enable Google Calendar API in Google Cloud Console
- Create OAuth 2.0 credentials and download JSON credentials file
- Required scope: <https://www.googleapis.com/auth/calendar>
- Store refresh token securely server-side — never expose credentials client-side
- Use Google Calendar API v3

## Booking Confirmation Emails

### To the lead (auto-send):

Subject: You're booked in — Peak Studios CO

Hi [First Name],

You're all set! Here are your booking details:

Date: [Date]

Time: [Time] Pacific Time

Format: Phone or video call — we'll follow up with details

We're looking forward to chatting with you. If you need to reschedule, just reply to this email.

See you soon,

[Owner Name]

Peak Studios CO

### To the owner (auto-send):

Subject: New booking — [First Name] [Last Name]

New discovery call booked!

Name: [First Name] [Last Name]

Email: [Email]

Phone: [Phone]

Date/Time: [Date] at [Time]

Package interest: [Package]

Notes: [Notes]

This has been added to your Google Calendar.

---

## SECTION 4 — CRM & EMAIL SEQUENCE SPEC

---

### Lead Capture Fields

- First Name
- Last Name
- Email
- Phone (if provided)
- Package interest
- Notes from form
- Date/time of form submission
- Source (Landing Page)
- Booking status: Booked / Not Yet Booked

### Email Sequence Trigger Logic

#### **If lead books immediately:**

Send booking confirmation email. Do NOT start follow-up sequence. Mark as "Booked" in CRM.

#### **If lead submits form but does NOT book:**

Start the 5-email follow-up sequence. Stop sequence automatically if they book at any point.

### CRM Minimum Requirements

- Store all lead data listed above
- Track email open/send status per lead
- Allow owner to manually update booking status
- Stop sequence when lead is marked as Booked
- Simple dashboard: new leads, booked calls, sequence status per lead
- Email sending via transactional service (recommended: Resend, Postmark, or SendGrid — all have free tiers)

---

## SECTION 5 — META ADS INTEGRATION

---

### Meta Pixel Setup

- Install Meta Pixel on landing page
- Fire standard "PageView" event on page load
- Fire "Lead" event when booking is confirmed
- This allows Meta to optimise ad delivery for people likely to convert

### Landing Page Optimisation for Cold Traffic

- State clearly what the service is within the first 3 seconds of scrolling
- Show real pricing — cold traffic converts better with transparent pricing
- Single focused CTA — no confusion about what to do next

- Load fast on mobile — Meta traffic is predominantly mobile
- Feel premium and trustworthy immediately — apply brand colours, fonts, and logo

## SECTION 6 — TECH STACK RECOMMENDATION

| Landing page        | Next.js or plain HTML/CSS | Keep simple and fast               |
|---------------------|---------------------------|------------------------------------|
| Booking UI          | Custom built              | Simple form + calendar slot picker |
| Google Calendar     | Google Calendar API v3    | OAuth 2.0 authentication           |
| CRM / Email         | Custom or Loops.so        | Or EmailOctopus for sequences      |
| Transactional email | Resend or Postmark        | Reliable delivery, easy setup      |
| Database            | Supabase or PlanetScale   | Free tiers available               |
| Hosting             | Vercel or Netlify         | Free tiers, fast CDN               |
| Meta Pixel          | Meta Events Manager       | Standard pixel install             |

## SECTION 7 — DEVELOPER CHECKLIST

- Landing page built to spec with brand kit applied
- Meta Pixel installed and firing correctly
- Booking form captures all required lead fields
- Google Calendar API connected to peaklegacyvideos@gmail.com
- Available slots pull live from Google Calendar (Mon–Fri 9am–5pm PT)
- Booking creates Google Calendar event with lead details
- Confirmation email sends to lead on booking
- Notification email sends to peaklegacyvideos@gmail.com on booking
- All leads captured in CRM
- 5-email follow-up sequence triggers for non-bookers
- Sequence stops when lead books
- Owner dashboard to view leads and update status
- Page is mobile-optimised and loads under 3 seconds
- SSL enabled (HTTPS)

■ UTM parameters captured from Meta ads
